Requirement already satisfied: six>=1.5 in ./anaconda3/lib/python3.7/site-packages (from python-dateutil>=2.5.0->pandas) (1.12.0)
DEPRECATION: pandas 0.24.2 has a non-standard dependency specifier pytz>=2011k. pip 24.1 will enforce this behaviour change. A possible replacement is to upgrade to a newer version of pandas or contact the author to suggest that they release a version with a conforming dependency specifiers. Discussion can be found at <https://github.com/pypa/pip/issues/12063>
Note: you may need to restart the kernel to use updated packages.
